ABOUT ME

I am a Full-Stack Web developer. Experienced in developing high complexity codes, APIs, maintaining, automating, establishing and maintaining standards. I believe I can contribute to the development team not only to technical skills but also with soft skills, such as communication, leadership, collaboration and problem solving. I am currently studying and deepening knowledge in TypeScript, Docker, UI and UX.

STACKS

- Python, Javascript, SQL, Node.js, React.js, Next.js, Git, MongoDB, Django, FastAPI

LANGUAGES

- Advanced English
- Fluent Portuguese

07/2022 - 02/2023 **SYSTEMS DEVELOPER**

Reduza Veículos – Ribeirão Preto

I worked as a system developer and developed a spa website with Django, Fastapi and Nextjs, Sonde reached 50,000 monthly impressions with Googleads. Thus it was possible to impact and capture new customers. In addition I also created basic Nodejs systems that facilitated the company's routine.

01/2022 - 07/2022 **INSIDE SALES TECHNICAL LEADER**

Dryve - Ribeirão Preto

After stressing myself in the previous position I was promoted to Dryve Technical Leader in Ribeirão Preto, leading team of 3 employees, developed technical and managerial skills, and I developed an API with Nodejs, with data analysis in Python and Dashboards in Powerbi. Through this API it was possible to reduce the cost of catchment by 20% maintaining the same performance in Lead Capture.

INSIDE SALES ANALYST

Dryve - Ribeirão Preto

Dryve is a fintech that brokens financing lines with traditional banks, with annual revenues of \$ 70 million. I went beyond the description of the current position and was able to develop task automation models with Nodejs, Reactjs and Python, contributing to the creation of dashboards for insights in the area. Which guaranteed me a promotion in the same department.

VOLUNTEERING

10/2020 - 05/2021 **BUSINESS PLAN**

Junior FEARP – Ribeirão Preto

I worked as a volunteer at Junior Fearp, a junior company of USP, creating business plans for new companies in the state of São Paulo. I was responsible for developing the statistical and mathematical part of some projects using Python, SQL and Nodejs.

09/2020 - 11/2020 **INVESTMENT PORTFOLIO**

I participated in the Financial Market Club, a university student entity related to the investment market, where I had my first contact with the program, I developed investment portfolios using Python, HTML and CSS. This experience allowed me to learn to manipulate data and create web projects and encouraged me to learn other important technologies for future projects.

ACADEMIC EDUCATION

01/2020 - 12/2024 **GRADUATION IN ADMINISTRATION & BUSINESS**

*Faculdade de Economia, Administração e Contabilidade
University of São Paulo - USP*
